Re: WCUZ(FM), Bear Lake, Michigan
Facility Identification Number: 57416
Fort Bend Broadcasting Company
Special Temporary Authorization

Dear Mr. Hannel:

This is in reference to the request filed January 23, 2008, on behalf of Fort Bend Broadcasting Company ("FBBC"). FBBC requests extension of the special temporary authority ("STA") granted on July 23, 2007, to operate Station WCUZ from a site other than the licensed site.¹ In support of the request, FBBC states that it has filed an application for construction permit to relocate the station, and that the application remains pending.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoring licensed operation. Thus, extension of STA is warranted.

¹ WCUZ is licensed for operation on Channel 261A (100.1 MHz) with effective radiated power ("ERP") of 3 kW (H&V) and antenna height above average terrain ("HAAT") of 100 meters. Construction Permit BPH-20050308ABT authorizes relocation of the transmitter and operation with ERP of 3.8 kW and haat of 126 meters. Application BMPH-20070919ACM requests a channel change and upgrade to Class C3, further relocation of the transmitter, and operation on Channel 264C3 (100.7 MHz) with ERP of 25 kW and HAAT of 100 meters.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WCUZ may continue to operate with the following facilities:

Geographic coordinates:	44° 24' 20" N, 86° 8' 59" W (NAD 1927)
Channel	261 (100.1 MHz)
Effective radiated power:	0.4 kilowatt (H&V)
Antenna height:	
above ground:	10 meters
above mean sea level:	274 meters
Above average terrain:	46 meters

FBBC must notify the Commission when licensed operation is restored. FBBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **January 16, 2009**.

Sincerely,

Charles N. Miller, Engineer
